

4<sup>th</sup> Conference of the African Federation of Clinical Chemistry  
AFCCLabMed Victoria 2015  
28-30 April 2015  
Victoria Falls, Zimbabwe

---

*Integrating Clinical Chemistry and Laboratory  
Medicine in Evidence Based P4 Medicine*

Dear Colleagues

As Chair of the Conference Organizing Committee (COC), I would like to invite you to the 4<sup>th</sup> Biennial Conference of the African Federation of Clinical Chemistry (AFCC), hosted by the Association of Clinical Biochemistry Zimbabwe (ACBZ). The conference will be held from 28<sup>th</sup> – 30<sup>th</sup> April 2015 in Victoria Falls.

The theme for the conference “Integrating Clinical Chemistry and Laboratory Medicine in Evidence Based P4 Medicine” is very appropriate as it encompasses the Preventive, Predictive, Personalized and Participatory aspects of Medicine all of which are essential to improve patient care.

The Scientific Committee is planning a diverse program with lectures by many eminent speakers from the continent and globally. I believe that this will be a great opportunity for the participants to have formal and informal mutual communication from other countries, pertaining to the most recent advances in the various exciting fields of clinical biochemistry.

I trust that participants from all AFCC Member Countries will attend, to ensure togetherness in the pursuit of our common goal in ensuring the advancement of clinical chemistry and laboratory medicine on our continent.

I hope that you will take this opportunity to visit the breathtaking sights, and enjoy the warm Zimbabwean spirit of friendship from this conference.

We look forward to welcoming you to this event.

Vanessa Steenkamp  
Chair: AFCCLabMed 2015  
Past-President AFCC
